The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

For a petition to be considered valid it must:

- 1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
- 2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
- 3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
- 4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : FW-24489

Stream : Lancassange Creek

Applicant : Allison Lane Animal Hospital

Jim Roberts 1660 Allison Lane

Jeffersonville, IN 47130-5537

Description : A commercial facility will be developed along the north bank of Lancassange

Creek in order to provide a building addition to the existing Allison Lane Animal Hospital. The facility will consist of a 24' by 34' building constructed at the rear of the existing building. The lowest floor elevation of the building will be 455.80', NGVD. Details of the project are contained in information received electronically at the Division of Water on September 17, 2007 and in plans and information

received at the Division of Water on

Location : This project is located on the east side of Allison Lane, approximately 200' south

of the intersection of Middle Road and Allison Lane at Jeffersonville, Charlestown Township, Clark County Clark Military Grant #12, Jeffersonville, IN-KY Quadrangle

Quad Code: 3808536

Statute/Rule : Flood Control Act, IC 14-28-1, with the associated Flood Hazard Area Rule, 312

Application # : FW-24492

Stream : Unnamed Tributary French

Lick Creek

Applicant : Margo Frances Wolfe

6213 East County Road 250 South

Paoli, IN 47454

Description : Two arch corrugated metal pipes have been plaed along 60' of an Unnamed

Tributary French Lick Creek. Also, several feet of fill has been placed on the tract to provide an access road across the corrugated pipes. Additional work in the floodway will consist of major reshaping of the current topography to return the site to previous grade. Details of the project are contained in information and

plans received at the Division of Water on September 17, 2007.

Location : The parcel located just east of the intersection of State Road 145 and Habig Drive

in French Lick, Indiana. It is along the north side of Habig Drive abutting French

Lick Creek and bisected by an Unnamed Tributary to French Lick Creek

near French Lick, French Lick Township, Orange County

Application # : FW-24493

Stream : Sugar Creek

Applicant : Rockies Express Pipeline LLC

Alice Weekley

500 Dallas Street, Suite 1000 Houston, TX 77002-4718

Description : A 42" diameter steel natural gas pipeline will be placed beneath Sugar Creek to

transport natural gas produced in the Rocky Mountain basins for delivery to other pipelines and distribution customers located in the upper Midwest and Eastern United States. The pipeline will be placed by the open-cut construction method. It will have a minimum of 5' of cover beneath the streambed and a minimum of 3'

in the banks. Details of the project are contained in information received

electronically at the Division of Water on September 18, 2007 and in plans and

information received at the Division of Water on

Location : The pipeline will cross Sugar Creek about 1.4 miles (approximately 7392')

southeast of Amity about 1.1 (approximately 5808') miles due east of U.S. Highway 31, and about 0.3 mile (approximately 1584') due south of the

intersection of the creek with East 400 South

near Amity, Blue River Township, Johnson County

Application # : FW-24496

Stream : Galena River

Applicant : Northern Indiana Commuter Transportation District

Christopher M Beck 601 N. Roeske Avenue

Michigan City, IN 46360-2669

Description

The existing 20'-6" single span structure carrying the Galena River over the Chicago South Shore and South Bend Railroad will be replaced with a new culvert system to reduce upstream flood damages. The new crossing will consist of a 24'-0" span x 10'-0" rise x 20'-1.5" long precast concrete arch culvert set in precast concrete headwalls, with 2'-0" of the structure rise being buried. The new culvert will have an upstream and downstream invert of 650.4', NGVD and 650.6', NGVD respectively. The inlet end of the culvert will be square with skewed headwalls. The culvert and headwalls will be on the same alignment as existing to align with streamflow. Minor channel shaping will occur both downstream and upstream of the new culvert to improve the flow transition at the crossing and will taper back to meet the existing conditions. The shaping will be confined to the construction right-of- way. The reshaped areas will be stabilized with atleast 24" thick of riprap scour protection. There will be no change to the railroad track grade. The arch structure was sized to provide the minimum horizontal track clearances and requirements, matching the existing conditions. The top of track elevation will remain the same. the project is not federally funded. Details of the project are contained in information received electronically at the Division of Water on September 18, 2007 and in plans and information received at the Division of Water on

Location

 Approximately 0.65 miles (approximately 3432') east of the intersection of SR 39 and the Chicago South Shore and South Bend Railroad near Springfield, Center Township, Lake County Section 26, T 38N, R 3W, Springville Quadrangle

Quad Code: 4108666

Application # : FW-24497

Stream : West Fork White River

Applicant : LBG-1-LLC

Thomas Smith

9800 Association Court Indianapolis, IN 46280-1962

Description : A campground will be developed along the east (right) bank of the West Fork

White River. The existing use was a sand/gravel mines that are now large lakes. The project has a series of existing and proposed roads and paths surrounding the lakes. There will be minor grading along the main road for RV access to camp sites and two restroom facilities. The campstore and gate house will be out of the floodway. Details of the project are contained in information received electronically at the Division of Water on September 19, 2007 and in plans and

information received at the Division of Water on

Location : The property is located east of the West Fork White River at the Goose Creek

confluence, which is west of State Road 37 and County Road 800 North

intersection

near Waverly, Harrison Township, Morgan County Section 12, T 13N, R 2E, Mooresville East Quadrangle

IAC 10

Application # : PL-20825

Lake : Big Chapman Lake

Applicant :

Description : An existing 750' by 25' channel will be dredged. Approximately 75,000 cubic

yards of accumulated muck and debris will be removed from the channel bed by dredging to a maximum depth of 8' below the lake's legal level at the center of the channel and sloping uniformly to a depth of 1' at the shoreline. The excavated material will be transported to an upland containment area for dewatering and

disposal. Details of the project are contained in information received electronically at the Division of Water on July 23, 2007 and in plans and

information received at the Division of Water on August 20, 2007 and September

18, 2007.
